

Git Training

Overview :

This 1 day training is intended for developers who want to learn how to use Git. In a 50 to 60% lab-time approach, the participants get a real hands-on experience and they learn how to avoid classical pitfalls. During the training, all attendees get direct feed-back in an interactive manner, and at the end of the training they are ready to work with Git.

Knowledge prerequisites :

- None. However, experience on the command line is beneficial.

Method :

Course/Workshop, classical educations with practical exercises.
Course materials provided.

Course Flow :

Git internals

- explanation of important terms
- overview of the internal structure of Git

Git basics
